Key Insights

1. **Staples are stable, perishables are not.** Wheat, bajra, and mustard have an average price spread of only 2 to 4%, while guar, wet peas, and spinach reach 36 to 47% (commodities sold in 10 or more markets).
2. **Jasmine has the widest price gap.** Its market price ranges from ₹400 to ₹1,150 per kg across 11 markets, a ₹750 gap.
3. **Tomato prices vary a lot by location.** They range from ₹7 to ₹69 per kg across 266 markets. Maharashtra is the cheapest state on average (about ₹11 per kg), while Tamil Nadu averages about ₹37 per kg.

About the Data

Source: Agmarknet daily mandi prices (data.gov.in), snapshot dated 1 Nov 2026.
Cleaning: Removed rows with a modal price under ₹100 per quintal (suspected unit errors) and one garbled commodity name; converted prices from ₹/quintal to ₹/kg. Final dataset: 8,842 rows, 22 states.
Limitations: Single-day snapshot, so no trends over time. Tamil Nadu has the most markets reporting, so state averages are weighted by reporting markets. Some units may still be inconsistent across markets.
